

Pain or Numbness in Your Hands or Feet?

By Erica Rainer

Pain and Numbness in your hands or feet, a feeling of burning, extreme cold, tingling, electrical shock like pain, even the feeling of walking on bubble wrap or like there is a sock balled up under your foot... these are all symptoms experienced by those suffering with **Peripheral Neuropathy**. Unfortunately drugs and injections only mask the pain and there is no surgery, other than amputation, that will heal/stop neuropathy from progressing.

Neuropathy is a term used to describe damaged nerves, primarily in the hands and/or feet, that are progressively breaking down due to a lack of blood supply, nutrients and oxygen reaching the nerves along with a lack of communication from the brain. Since the nerves are what the brain uses to communicate with the area and they are breaking down, the brain's ability to communicate with the area lessens over time, allowing for the progression of more breakdown and worse symptoms. It can be caused by Diabetes, Poor Circulation, Poor Nutrition, Chemotherapy, Agent Orange, Misaligned Spinal Bones Placing Pressure on the Nerves, along with over 100 other causes. "Patients experience extreme sensations, loss of feeling, even No Feelings in their Hands and/or Feet along with muscles spasms, pain, weakness, numbness, tingling and burning and may have a very hard time with balance" says Dr. James Ide, clinic director at Painless Chiropractic & Neuropathy Treatment Center.

This condition can eventually lead to further nerve damage, causing complete loss of legs or arms leading to amputation, death or brain injury due to falls, burns or other injuries that will not heal, along with organ failure in some cases.

Are you or someone you love suffering with loss of balance, numbness or pain in your hands and/or feet that just won't heal?

You are not alone.

More than 20 Million people in the U.S. are dealing with some form of Neuropathy. Most commonly noticed first in the hands or feet, causing weakness, numbness, tingling pain and debilitating balance problems, often frustrated with no place to turn and no hope of recovery. "By the time they come to see us, they feel like they have tried everything. Their MD put them on Anti-Seizure or Epilepsy meds like Gabapentin, Neurontin, Cymbalta or Lyrica and told them they will just have to live with the pain." said Dr. Ide.

That is until now...

With recent advancements in nerve regeneration technology and treatment options, clinics all over are seeing larger success rates and faster results with their neuropathy patients.

New Medical Breakthrough for Neuropathy

The development and success of the new Neuropathy Protocols by Dr. Ide and his team at Painless Chiropractic & Neuropathy Treatment Center have been the talk of the town in recent months. "This new technology paired with our multifaceted approach, has been life altering for our patients and our clinic. There has been an increase in Neuropathy patients and the results that they are getting is truly amazing, we have 95% or higher Success Rate" said, the Patient Coordinator at the clinic. There are some things people can do at home to aide in the healing process of their neuropathy however, **healing neuropathy is an all-encompassing process that will require lifestyle changes, home care and -may or may not - include chiropractic, (varying from patient to patient) along with guidance from a medical professional that is experienced, skilled and board certified in neuropathy.**

Dr. James Ide and his skilled care team, board certified in the treatment of Neuropathy, have been treating patients for almost a decade now and judging by their reviews, they have been doing a very good job providing excellent patient care.
